Why do I need a medical alert system?

1 IN 4 older adults falls every year. Falling once doubles the risk of falling again.1

Falls are the leading cause of injuries and deaths among older adults.1

After a fall, 90% of older adults who get help within 1 hour will be able to return home.1

ABOUT OUR PROGRAM

We provide affordable and reliable medical alert services to all those who wish to live an independent life, regardless of their limitations. Designed to fit any lifestyle or budget, our top-rated product suite features the most advanced and innovative technology in the PERS industry, ensuring your safety at home or anywhere you go. PLUS, enjoy the following benefits when you sign up for our life-saving service:

100% US-Based Monitoring

Our monitoring center is highly accredited and 100% based within the U.S. This means that help is dispatched and sent directly to you—locally and across all 50 states. When you press your button, our operators will dispatch either emergency or non-emergency services, depending on your needs.

ON-THE-GO

Mobile Guardian 2.0
All-in-one lightweight wearable device
• Wearable 2-way communication
• Location tracking using GPS, WIFI, and Cellular Triangulation
• 4G LTE service
• Multiple Peripherals
• Fall detection Compatible

Enjoy the freedom to keep doing what you love both inside and outside of your home with the all new Mobile Guardian 2.0, and all-in-one medical alert system that you can wear around your neck or clipped to your belt. Or throw it in your pocket or purse and just wear a wrist or neck pendant. Comes with optional fall detection capabilities.

Mini Guardian
Small, lightweight, 4G LTE service
• Location tracking using GPS, WIFI, and Cellular Triangulation
• Extended battery life of up to 5 days
• Fall detection compatible
• Two-way voice speaker
• Available in 3 colors: black, silver, white

At 1/2 the width and 1/2 the weight of a traditional mobile medical alert system, Mini Guardian is a small, sleek — and reliable — wearable device that’s jam-packed with life-saving features.
